PROFESSIONAL SUMMARY

Strategically transitioning Data Engineer, combining **15 years of experience in leadership and operations** with a **solid technical background in Data Engineering, Data Science, and Artificial Intelligence**. Specialist in **design and implementation of scalable data pipelines, process automation, and integration of AI into workflows**.

Key Differentiator: I understand both the technical and business perspectives, allowing me to translate complex requirements into efficient data architectures. Hands-on experience in **ETL/ELT, pipeline orchestration, data modeling, and automation with Python and low-code tools** (n8n, Zapier).

Focus: Data Engineer positions in remote environments, with a preference for startups and scale-ups that value innovation, automation, and data quality.

TECHNICAL SKILLS

Languages & Programming

- **Python** (Pandas, NumPy, Matplotlib, Scikit-learn) — Intermediate/Advanced Level
- **SQL** (Advanced Queries, Joins, Aggregations, CTEs) — Intermediate Level
- **Git/GitHub** — Version Control, CI/CD

Tools & Platforms

- **Orchestration:** n8n, Zapier, Make
- **Databases:** PostgreSQL, MySQL, Google Sheets
- **Development:** Jupyter Notebooks, Git, GitHub
- **AI/LLMs:** OpenAI API, Prompt Engineering

- **Integration:** WhatsApp API, Notion API, REST APIs
- **Visualization:** Streamlit (prototyping)

Methodologies

- **Agile/Scrum**
- **Design Thinking & Design Sprint**
- **Data-Driven Decision Making**
- **Requirements Analysis & Stakeholder Management**

Languages

- **English:** Advanced (C1 — Full Professional Proficiency)
 - **Portuguese:** Native
-

PROFESSIONAL EXPERIENCE

Consultant Sales Representative — Data Analysis & Operations

Aché Pharmaceutical Laboratory | Jan 2023 – Nov 2025 | 2 years 11 months

- Structured quantitative and qualitative feedback collection processes (User Research), generating insights that impacted marketing and product strategy decisions
- Analyzed territorial data and KPIs to optimize resource allocation, reducing operational waste by ~15%
- Implemented performance dashboard monitoring, enabling real-time data-driven decisions
- Translated field needs into technical requirements for product teams, acting as a bridge between operations and development
- Conducted client engagement pilots, validating hypotheses with data before large-scale rollout

Technologies: Excel, Google Sheets, Data Analysis, KPIs, User Research

Sales Executive — Product Insights & Operations

iFood | Feb 2021 – Sep 2022 | 1 year 8 months

- Conducted data analysis on restaurant partners to identify operational bottlenecks and frictions in the digital journey
- Mapped user behavior through data analysis, generating insights that increased activation by ~20% and retention by ~12%
- Translated operational needs from the field into technical requirements for the development team, contributing to the evolution of the HUB logistics system
- Monitored performance dashboards to prioritize strategic actions, resulting in greater operational efficiency
- Acted as Product Owner in pilots, validating solutions before large-scale implementation

Technologies: Data Analysis, Dashboards, Product Management, SQL

Commercial Manager — Market Entry & Operations

Fachini Machinery (USA) | Feb 2015 – Jan 2017 | 2 years

- Structured North American operations based on market analysis and functional requirement validation
- Conducted user discovery to define product-market fit
- Defined success metrics and supervised the implementation of scalable operational processes
- Acted as the first Product Owner, leading the adaptation of the value proposition to the local market

Technologies: Market Analysis, Process Management, Stakeholder Management

TECHNICAL PROJECTS & PORTFOLIO

1. Corporate RAG Chatbot with CI/CD and Monitoring

GitHub: [diegosantos-ai/chatbot-rag-corporate](#)

Corporate chatbot with Retrieval-Augmented Generation (RAG) for technical document querying. Complete architecture with CI/CD (GitHub Actions), feedback monitoring via MLflow, and automated deployment.

Impact: Reduced document query response time by ~80%, increasing team productivity.

Technologies: Python, LangChain, OpenAI, GitHub Actions, MLflow, Docker

2. CNPJ Data Pipeline with Automation

GitHub: [diegosantos-ai/cnpj-data-pipeline](#)

Automated ETL pipeline for collecting, transforming, and loading CNPJ data. Implements quality validation, error handling, and structured logging.

Impact: Automated a manual process that took ~4 hours/day, freeing up team time for higher-value analysis.

Technologies: Python, Pandas, PostgreSQL, Logging, Error Handling

3. Customer Service Sentiment Analyzer (Portuguese)

GitHub: [diegosantos-ai/cx-sentiment-analyzer-ptbr](#)

Streamlit application for sentiment analysis in Brazilian Portuguese, using NLP and classification models. Intuitive interface for non-technical users.

Impact: Enabled automatic analysis of ~1000 messages/day, identifying dissatisfaction patterns in real-time.

Technologies: Python, Streamlit, NLP, Scikit-learn, Matplotlib

4. Job Vacancy Collection and Prioritization System with AI

GitHub: [diegosantos-ai/pega-vagas](#)

Automation that collects vacancies from multiple sources, structures data, classifies with AI, and prioritizes by relevance. Integration with Notion for visualization.

Impact: Reduced job screening time by ~70%, increasing coverage of analyzed opportunities.

Technologies: Python, n8n, OpenAI, Notion API, Automation

5. Churn Analysis in Subscription Model

GitHub: [diegosantos-ai/churn-analysis](#)

Exploratory analysis and churn modeling using Scikit-learn. Identification of behavioral patterns and prediction of at-risk customers.

Impact: Identified 3 main churn patterns, enabling preventive actions that reduced the rate by ~8%.

Technologies: Python, Pandas, Scikit-learn, Matplotlib, Jupyter Notebook

6. CRM MVP with PostgreSQL and AI Consultant

GitHub: [diegosantos-ai/nexo-basis-crm](#)

CRM MVP with Streamlit interface, persistence in PostgreSQL, proposal generation, and integrated AI consultant.

Impact: Rapid prototyping allowed for concept validation in 2 weeks, reducing decision time.

Technologies: Python, Streamlit, PostgreSQL, OpenAI, Software Architecture

EDUCATION

Postgraduate Degree in Data Science and Artificial Intelligence

Anhanguera | Expected Completion: April 2026

Focus: Machine Learning Algorithms, Big Data, Natural Language Processing (NLP), Applied Statistics, Data Engineering.

Postgraduate Degree in Agile Leadership: People, Projects, and Innovation

Pontifical Catholic University of Paraná (PUC-PR) | Completed: December 2025

Final Grade: **8.79/10**

Subjects: Agile Management, Design Thinking, Design Sprint, Leadership, Project Governance, Soft Skills for Negotiation.

Technologist Degree in Systems Analysis and Development

Technologist Degree in Systems Analysis and Development

University Center Assis Gurgacz | Completed: December 2024

Focus: Data Structures, Programming Logic, Software Engineering, Databases, Web Development.

MBA in Business Management

Univel | 2018–2020

Bachelor's Degree in Business Administration

University Center Assis Gurgacz | 2019–2022

Additional Certifications

- **IBM Data Engineering Professional Certificate** (in progress) — Python, SQL, Relational Databases, Pipelines
 - **Python for Data Science, AI & Development** — IBM
 - **Introduction to Data Engineering** — IBM
 - **Python Project for Data Engineering** — IBM
 - **Introduction to Relational Databases (RDBMS)** — IBM
 - **Immersion in Artificial Intelligence** — Alura/Google
 - **Prompt Engineering for ChatGPT** — Vanderbilt University
 - **Mindfulness and Work: Psychosocial Skills** — PUC-PR
-

CONTRIBUTIONS & ACTIVITY

- **315 contributions** on GitHub in the last year
 - **9 public repositories** with Data Engineering projects
 - **Active in:** Python, SQL, Automation, AI/LLMs, Data Engineering
 - **Contribution composition:** 73% commits, 25% issues, 2% pull requests
-

COMPETITIVE ADVANTAGE

1. **Business Acumen:** 15 years in leadership and operations. I understand the "why" of the data, not just the "how".
 2. **Automation Experience:** Expertise in n8n, Zapier, Make — increasingly valued low-code tools.
 3. **AI/LLMs Experience:** Hands-on projects with OpenAI, Prompt Engineering, Intelligent Agents.
 4. **Visible Portfolio:** 9 projects on GitHub with clear documentation and business impact.
 5. **Clear Communication:** Ability to translate technical concepts for non-technical stakeholders.
-

AVAILABILITY

- **Modality:** 100% Remote
 - **Location:** Francisco Beltrão, PR, Brazil
 - **Schedule:** Flexible (UTC-3)
 - **Start Availability:** Immediate
-
